Ian Hendry, ian.hendry@bridon-usa.com

The Bridon USA company was founded in 1975 as an innovator in plastic agricultural baling twine. Continuous improvement, and a strong dealer network made Bridon the number-one name for quality agricultural twine and world-class netwrap.

To this day, all Bridon USA products are manufactured in the USA and around the world using industry-leading technology. Bridon HD & large-square twines are manufactured in our Jerome Idaho facility, for superior performance in North American balers & conditions.

Bridon USA is headquartered in Dubuque Iowa, preserving their commitment to keeping customer service and technical support local and invest in their community and country.
