Dairyland Laboratories, Inc. is an independent, full-service agricultural testing laboratory offering accurate and timely analysis of feeds, forages, water, molds, and mycotoxins.

The laboratory staff, with more than 60 chemists and trained technicians, use wet chemistry and near infrared (NIR) testing methods to deliver important information to agricultural producers, nutrition and crop consultants, feed companies, researchers, crop geneticists and agricultural equipment manufacturers. Dairyland Laboratories' clients are based in 42 states and 20 foreign countries, including in six Canadian provinces.
