INNOVACIONES IMABE is a Spanish company, founded in 1975 by the Benítez family, which provides solutions for the recycling and waste treatment industry, as well as for fodder baling.

Since its inception, the company has distinguished itself by a clear international and exporting character, positioning itself as a global leader in the sector and obtaining most of its income abroad. Proof of this are the more than 3,000 installations that the company has carried out in more than 60 different countries in its 45 years of experience. INNOVACIONES IMABE has delegations in the United States, Mexico, Argentina and Russia.

INNOVACIONES IMABE is a customer-focused company, with a wide range of solutions, personalized attention and the best professionals, to provide the response that best meets the specific needs of the customer. IMABE INNOVATIONS also provides comprehensive solutions, carrying out the design, manufacturing and installation of the equipment itself. For this, the company has facilities of 40,000 m² at its headquarters in Arganda del Rey. The company also has its own technical service.

Based on its extensive experience, INNOVACIONES IMABE manufactures equipment of excellent quality and cutting-edge technology, which is characterized by its reliability, efficiency, robustness and durability. Always thinking of its customers, the company provides systems with low operation and maintenance costs, simple to operate and with integrated high-security elements, also making solutions with high levels of automation possible. IMABE INNOVATIONS also uses top brand supplies that allow easy replacement for its international customers.

Being a company based on excellence, constant innovation and close collaboration with its

customers, INNOVACIONES IMABE is the ideal place to obtain your solutions for the recycling and fodder baling industry.
