William Kampert, kagllc@protonmail.com

At Kampert Ag we provide premium products to wrap up and store your harvest. We are located in Lyon County Iowa in the Heartland of America.

Kampert Ag LLC was established in July 2020 by purchasing the netwrap, twine, and balewrap side of the company from Van Tilburg Ag LLC.

We (William & Amber Kampert) are the second generation coming into the Ag plastic supply business and plan to continue taking on portions of Van Tilburg Ag as they intend to retire. We share the same location and warehouse for your convenience, and we have the experience of Van Tilburg Ag LLC (EST 1983) backing us and our customers.

Van Tilburg Ag LLC was founded by Vernon and Susan Van Tilburg in 1983. They started with selling baggers, and by 1985 started selling silage bags out of the garage. It has since grown from bags & baggers to include bunker covers, reinforced “Raven” bunker covers, rebar, twine, netwrap, and balewrap.

If you haven't already, try our great products to find out what sets us apart from the rest. Whether you want one roll or a truckload, we will gladly assist you.
